- ifm electronic gmbh hereby declares that the device is in compliance with Directive 2014/53/EU.
- You will find the full text of the EU Declaration of Conformity, technical data, instructions, approvals, contacts and further information at www.ifm.com.
- The device has an operating frequency of 2400 - 2483.2 MHz and a maximum transmitter power of +4 dBm.
- Due to radio frequency exposure limits this device should be installed and operated with a minimum distance of 20 cm between the device and the body of the user or nearby persons.
- The device emits radio waves that may interfere with the operation of electronic devices in the vicinity, including pacemakers, hearing aids and defibrillators. If you have a pacemaker or other implanted medical device, do not use the sensor without first consulting your doctor or the manufacturer of your medical device. Keep a safe distance between the device and your medical products and refrain from further use of the device if you observe permanent impairment of your medical device.
- The device must not be operated within a radius of 20 km around Ny-Ålesund, Spitsbergen, Norway.
- Read the operating instructions before set-up and keep them for the duration of use.

For USA - FCC information
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

For Brasil - Agência Nacional de Telecomunicações (Anatel)

Anatel ID: 13389-20-12898

For further information, please consult the ANATEL website www.anatel.gov.br. This device must accept any harmful interference and may not cause interference with duly authorised systems.
